**"Remington"**

TO THE FRONT.

"Remington" means for Bicycles what it means for firearms—the Standard of Excellence. Remington reliability is the feature of the "Remington" Bicycle. Repair shops do not flourish because of Remington bicycles. The wonderful facilities of the great Remington Arms Co. are all at the service of "Remington" Bicycles. The same perfect knowledge of materials, the same high degree of proficiency in workmen, the same absolute accuracy of adjustment, and proportion that are devoted to its world-renowned rifles and guns are applied to its Bicycles.

Is it strange that "Remingtons" are to the front?
